Part 2 - (2)

12. Team Member Evaluations

Team Members: Cameron, Camila, Lana and Nicolle

At first, the work was evenly split, and everyone got right to work on their assigned duties. We were able to complete everything within the time allocated, and in my opinion, the entire team performed an outstanding job.

Also, if someone finishes their task earlier than anticipated, they will volunteer to perform any tasks that are still outstanding.

Everyone has shown strong performance and demonstrated a commitment to quality work.

We set up a group chat so that we could discuss the assessment whenever it was convenient for us.

Cameron proposed collaborating all of our work on GitHub so that he could consolidate everything into one when it came time to submit the assessment.

One area that I think we could improve on is making at least one attempt to get together in person, given that everyone is in the same city, allowing everyone to bounce ideas of each other and is clear on their tasks.
